ENERGY

BRING IT!

FREQUENTLY ASKED QUESTIONS

What is Energy?

Blended with a proprietary formula, Energy is a fusion of natural stimulants free of the jittery effects caused by today's leading energy drinks. It's a unique mix of a full spectrum of phytonutrients, potent antioxidant-rich polyphenols, a broad spectrum of powerful B vitamins to support brain function, and concentrated Green Tea Extract. The result is one extremely potent Energy drink that helps support the body's ability to sustain natural energy levels. Delivering nutrients to the body, Energy does not contain some of the same ingredients found in other energy drinks that can wreak havoc on your body.

What are phytonutrients?

Often referred to as phytochemicals or superfoods, phytonutrients are compounds found in plants that protect the plant from environmental challenges, such as drought, the sun's harsh rays, or insects. When we consume plants rich in phytonutrients, they help protect and support our health.

What are polyphenols?

Polyphenols act as powerful antioxidants. They protect your body's cells from damage that can be caused by free radicals.

What is included in the proprietary energy blend?

Green Tea Extract, Caffeine, Blueberry Juice Concentrate, Cherry Juice Concentrate, Cranberry Juice Concentrate, Folic Acid, Gotu Kola (Hydrocotyle asiatica) Leaf/Root Extract, Pear Juice Concentrate, Prickly Pear (Opuntia ficus indica), Raspberry Juice Concentrate, Strawberry Juice Concentrate.

What does Energy taste like?

Energy has a refreshing, sparkly flavor mostly thanks to the large number of natural juice concentrates in the proprietary blend.

What is the size/quantity of Energy?

Each can of Energy contains 8.4 fluid ounces (250 mL). Energy is sold in cases of 24 cans.

Can children drink Energy?

No. Energy is recommended for adults 18 and older only. This beverage contains 100 mg of caffeine per can, so it is not recommended for children, pregnant or nursing women, and individuals sensitive to caffeine.

How many cans of Energy can a person drink in one day?

It is recommended that adults 18 years or older should consume no more than two cans of Energy per day.

What is crystalline fructose?

Crystalline fructose is a natural fruit derived sweetener. With a lower glycemic index, crystalline fructose causes a significantly lower rise in blood sugar than table sugar, or high fructose corn syrup (the common sweetener found in many other energy drinks)

Where does the caffeine come from?

The source of the caffeine in Energy is Green Tea Extract.
