DIRECTIONS

Adults take 2 tablets before bedtime and 1 tablet in the morning as a dietary supplement. Drink at least 8 glasses of water daily.

NEW YOU™

BODY REVITALIZING FORMULA

FREQUENTLY ASKED QUESTIONS

What is New You?

New You is a one-of-a-kind longevity formula designed to naturally stimulate and support the production and release of your body's own human growth hormone, allowing you to more easily build lean muscle and turn back the hands of time from the inside out!

New You also includes natural polyphenols that help improve blood supply to the muscles and help to reduce the harmful effects of free radicals.

What are the benefits of taking New You?

Your body's production of human growth hormone declines as you age. By using New You to stimulate your body's ability to naturally produce and release its own human growth hormone, you'll see improved sleep and memory, better post-workout recovery, enhanced exercise endurance, and increased lean muscle mass.

Is there a certain age to start taking New You?

Because the body's production of human growth hormone begins to decline after the age of 30, most people will want to begin taking it at that age.

How often should I take New You and when?

New You is designed to be taken twice daily. Take one tablet in the morning and two tablets at night.

Can I give New You to my children?

New You is designed for adult use and is not recommended for children. Always consult your pediatrician before giving any supplements to children.

Can I take New You if I am pregnant or nursing?

We suggest that you consult your physician prior to using any of our products if you are pregnant or nursing.
